

ADDAPT MEMBER SHOWCASE

U.S. Dynamics Corporation

USD's products and services include: Military Sustainment Services & Inertial Products.

For over 50 years, U.S. Dynamics Corporation has delivered cost effective and elegant solutions in support of the most sophisticated customers in the world. U.S. Dynamics Corporation is a market leader in the support of legacy Radar and Inertial Product technologies. We are experts at reverse engineering, technology insertion and form-fit-function alternatives to sustain and improve mature and legacy systems. Our market niche is in obsolescence management and diminishing manufacturing sources and material shortage (DMSMS) challenges found within the Global Aerospace and Defense industry. U.S. Dynamics Corporation is ready to provide support on a variety of projects from initial design through shipping.
