

SINKER EDM CAPACITY AVAILABLE AT STERLING ENGINEERING

FOR IMMEDIATE RELEASE:

Please note that our **Sterling Engineering** facility in Barkhamsted, CT has available time, and is providing rapid delivery, on our sinker EDM equipment. Sinker EDM services are less costly on a per-hour basis than N/C machining, and they can be considerably less expensive than other technologies, such as laser, wire EDM, or water jet.

- (3) modern CNC sinker EDM machines
- 100-amp power capability for large electrode burns
- Height range up to 27"
- Diameter range up to 48"
- On-site tool room for manufacturing custom tooling and electrodes

Whether you are seeking EDM services only, or you are interested in a turnkey solution that includes both precision machining and EDM services, please contact us for a quote today.

For our existing customers, we are pleased to offer this service on a quick turn basis, with very competitive prices. To our new customers, we are looking forward to earning your business.
